SUMMARY

I am a Software Engineer specializing in robust, production-ready systems built with Java and Spring Boot. I am driven by the principle of using the right tool for the job, and my deep background in C/C++ allows me to quickly adapt to new technologies like .NET and various frontend frameworks. I seek out projects that demand high technical proficiency and have a meaningful purpose

EXPERIENCE

Full Stack Developer

Netcompany-Intrasoft

 October 2024 – Present  Athens, Greece

Contributing to the design, development, and maintenance of enterprise-grade systems across Java and .NET platforms, within an international, English-speaking environment.

- Developed and maintained backend services using Java 17, Spring Boot, and advanced programming techniques such as reflection and custom annotations alongside with React for Frontend
- Built and enhanced .NET-based Case Management Systems, ensuring modularity, maintainability, and testability, utilizing Angular for frontend development
- Deployed and monitored microservices in Kubernetes (K8s) clusters, implementing metrics collection, alerting, and system health dashboards.
- Designed and implemented asynchronous messaging solutions using RabbitMQ, ensuring robust, scalable inter-service communication.
- Proactively extended involvement in key project phases to verify performance stability and ensure that code changes do not introduce regressions or bottlenecks.
- Participated in cross-team collaboration and code reviews, promoting clean code practices and system optimization.
- Regularly communicated in English with international teams and clients, contributing to requirement analysis and daily stand-ups.

Junior Software Developer

Public Group

 2022 - 2024  Athens, Greece

Worked in creating new web applications.

- Developed and maintained enterprise-level applications using Java and Spring Boot.
- Implemented message brokering solutions with ActiveMQ and RabbitMQ.

- Collaborated with cross-functional teams to design, develop, and optimize software solutions.
- Provided comprehensive documentation and technical support, resolving bugs and issues.
- Leveraged MongoDB, Oracle, and Microsoft SQL Server databases to support application data storage and retrieval.

Computer Science Professor Assistant (subject: Data structures Programming techniques)

National and Kapodistrian University of Athens

 2021 - 2022  Athens, Greece

Provided academic assistance to undergraduate students.

- Tutored 30–40 students weekly, improving understanding of algorithm design and C development.
- Reviewed student code and projects, providing individualized technical feedback.

EDUCATION

Bachelor's in Informatics and Telecommunications

National and Kapodistrian University of Athens

 2019 - 2024  Athens, Greece

SKILLS

- Languages & Frameworks:** Java (11,17,21), Spring Boot, C++, SQL, Python
- Frontend:** ReactJS, Angular
- Messaging & Integration:** RabbitMQ, ActiveMQ
- Databases:** Oracle, MongoDB, Microsoft SQL Server, NoSQL
- DevOps & Tools:** Docker, Kubernetes (K8s), Git, CI/CD (Bitbucket Pipelines, Azure DevOps), Jira
- Development Practices:** Clean code, TDD, Agile (Scrum), CI/CD.

CERTIFICATION

Public Next Graduate Program

Completed a 500-hour in-depth Learning & Development Program with Instructor-Led training, On-The-Job training and e-learning courses provided by Code. Hub and Public Group.
